

# Paul Howard Fluting Jig Hinge Base 2020

[www.paulhowardwoodturner.co.uk](http://www.paulhowardwoodturner.co.uk)

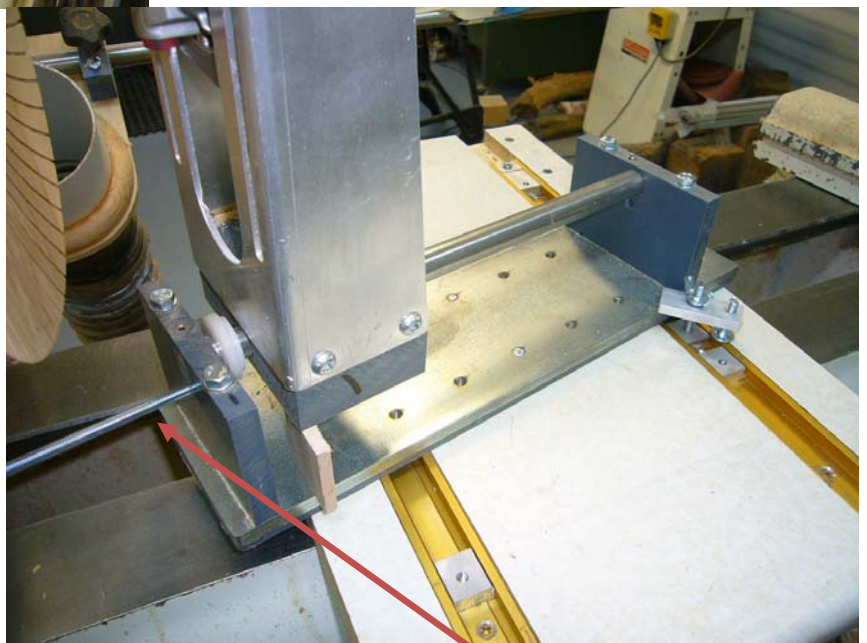

60 Flutes

Using the jig bush guide to control the depth of cut.

Hinge Base fitted to the jig using the original jig metal base and clamped to a base board on the lathe bed.

The jig can be raised up on a block to achieve smaller radius flutes or adjust the router mounting block to different heights.

Adjustable depth stop if the cutter guide bush is not used. This can be set up to fade flutes out at the end of the cut.
